RARE EMBER

ARCHITECTURAL LUXURY STREETWEAR • MASTER SYSTEM & UNIT ECONOMICS DOSSIER V2.0

EXECUTIVE ARCHITECTURE SPECIFICATION: This master blueprint details every minor to major subsystem of the RareEmber luxury streetwear platform. It reflects the corrected technical fabric standards: **never labeling 240 GSM as heavyweight** (accurately designated as `240 GSM STRUCTURED COTTON` and `240 GSM AEROKNIT MESH`), standardizing all outerwear specifications (320 GSM Acid Wash Fleece, 380 GSM Brushed Fleece, 320 GSM French Terry Hoodie), completely stripping internal factory SKU codes and the word "Blank" from customer-facing titles, and correctly factoring **18% GST (HSN 4016)** on the extended gaming desk mat for an uncompromised **25.9% Net Profit Margin**.

Module 1: End-to-End System Architecture & Lifecycle (Minor to Max Flow)

1.1 Storefront Discovery & Merchandising Layer

The storefront is engineered with **Next.js 16 (App Router)** and compiled via **Turbopack**. The discovery engine in `src/lib/products-server.ts` enforces strict quality filtering at runtime:

- **Zero 180 GSM Filter:** Every request is evaluated by `isDisallowed180GsmOrThin()`. All thin 180 GSM blanks (SKU 5474, basic crews, baby tees, crop tops, tank tops) are hard-filtered out of the public catalog.
- **Dynamic Garment Spec Badging:** `getGarmentSpecBadge()` extracts exact GSM and weave attributes from metadata, rendering badges (`240 GSM STRUCTURED COTTON`, `240 GSM AEROKNIT MESH`, `320 GSM ACID WASH FLEECE`, `380 GSM BRUSHED FLEECE`, `350 GSM VARSITY`) directly on product cards.
- **Canonical Size Sorting:** `sortSizes()` enforces standard garment ordering (`XS → S → M → L → XL → XXL → 3XL`), eliminating size permutation glitches.
- **Multi-Angle Color Switching:** `ProductGallery.tsx` reads `colorImages` dictionaries to instantly swap front, rear, and detailed model views upon selecting color swatches without page reloads.

1.2 Frictionless Dual-Rail Checkout (No Email OTP Verification)

To eliminate checkout friction while completely neutralizing Cash-on-Delivery RTO (Return to Origin) losses, RareEmber executes a high-converting **Two-Rail Checkout Model**:

⚡ RAIL 1: 100% PREPAID (DEFAULT & RECOMMENDED)

Mechanics: Customer pays 100% of order value upfront via Razorpay (UPI, Google Pay, PhonePe, Cards, NetBanking).

Incentive: Automatically applies an **Instant ₹50 UPI Discount** (e.g., ₹799 tee drops to ₹749).

Courier Surcharge: ₹0.00 Handling Fee. Expedited express air dispatch.

📦 RAIL 2: PARTIAL COD (₹100 ADVANCE BOOKING)

Mechanics: Customer pays a **₹100 online booking commitment** via Razorpay; remaining balance is collected in cash at the doorstep.

Courier Handling Fee: Transparent **₹49 COD Handling Surcharge** added to order total.

Anti-RTO Power: Filters out 100% of casual/fake orders while yielding a **+₹9 net cash margin upside** per COD delivery.

Email OTP Removal: Customer identity is anchored to their verified WhatsApp/Mobile number and delivery address with automatic state normalization (`normalizeIndianState()`), bypassing email verification delays.

1.3 Razorpay Payment Gateway Orchestration & Cryptographic Guard

Payment initialization and webhook verification are executed via server-side endpoints:

- **Order Initialization (`/api/checkout`):** Validates catalog prices against `enforcePriceFloor()`, prevents price tampering, computes net payable amounts (prepaid net vs. ₹100 deposit), and generates Razorpay Order IDs.
- **Webhook Verification (`/api/webhooks/razorpay`):** Uses Node.js `crypto.createHmac('sha256', secret)` to verify signatures. Replay protection ensures idempotency before updating database records.

1.4 Supabase Production Database State Machine

The PostgreSQL database in Supabase operates across synchronized tables with Row Level Security (RLS):

- `public.orders`: Tracks order lifecycle, customer contact, delivery address, payment rail (`prepaid` vs `partial_cod`), advance paid (₹100), remaining doorstep balance, and Delhivery AWB codes.
- `public.order_items`: Maps purchased items to exact size, color, quantity, and print codes.
- `public.products`: Stores live product status; verified to contain **0 active 180 GSM items**.

1.5 Tirupur Automated Dispatch Engine (Qikink API)

Upon successful payment verification, the system transmits production orders directly to Qikink's Tirupur apparel manufacturing facility via `src/lib/fulfillment/qikink.ts`:

- **Payload Mapping:** Line items are resolved against verified `qikinkClientProductId` or base blank SKUs (`US22`, `UC61`, `UH62`, `UJ31`).
- **Dual-Side DTF Execution:** High-definition archival DTF prints are instructed for both front chest/insignia and large rear statement artwork.
- **COD Balance Transmission:** For Partial COD orders, Qikink receives `order_type: 'cod'` with `cod_amount: order.cod_balance_remaining`, ensuring Delhivery collects the balance upon delivery.
- **Carrier Routing:** Automated dispatch via Delhivery Express Air or Blue Dart with instant AWB webhook return.

1.6 Composite GST Tax Invoice Architecture (HSN 6109 & 4016)

Automated invoice generation in `src/lib/notifications/email.ts` and `/invoice` enforces Indian GST law:

- **HSN 6109:** All knitted apparel products are classified under **5% GST** (2.5% CGST + 2.5% SGST intra-state, or 5% IGST inter-state).
- **Composite Surcharge Classification:** Under Section 8(a) of the CGST Act 2017, doorstep cash handling is ancillary to the principal supply of garments. The ₹49 COD fee is billed under **HSN 6109 at 5% GST** rather than standalone freight HSN 9968.
- **HSN 4016:** Gaming desk mats (vulcanized rubber base) are classified under **18% GST** (9% CGST + 9% SGST / 18% IGST), with ₹55.80 GST applied on the ₹310 wholesale base.

1.7 Post-Purchase Concierge, Live Tracking & Doorstep Returns

Customer experience is automated via `/track` and `/returns`:

- **Real-time Milestone Timeline:** `Order Placed → Payment Verified → Tirupur DTF Printing → Quality Inspection → Express Air Dispatched → Out for Delivery → Delivered`.
- **Carrier Polling:** Direct Delhivery tracking API integration streams live checkpoint scans.
- **7-Day Doorstep Returns:** Self-service portal for hassle-free size exchanges and damaged goods replacement.

1.8 Google Merchant Center Dedicated Feed Engine

Google Shopping XML feeds are served via `/api/feed/google.xml` and `/api/feed/google` for approved GMC Account ID **5885607413**:

- Zero 180 GSM items, crops, or basic tees are included in the feed payload.
- Mandatory Google taxonomy categories (`Apparel & Accessories > Clothing`), brand tags (`RareEmber`), adult unisex attributes, zero-cost express air delivery, and `7_day_returns` labels are strictly generated.

1.9 Retention Engine, Tiered Discounts & Post-Delivery 90-Day Loyalty Vouchers

To compound customer lifetime value (LTV) and guarantee repeat purchases while protecting gross margins:

- **Tiered Instant Checkout Discounts:** Orders < ₹2,000 receive **₹50 Instant UPI Discount** (`PREPAID50`). Orders ≥ ₹2,000 receive **₹100 Instant VIP Discount** (`ARCHIVE100`). Evaluated strictly server-side; non-stackable.
- **Buy Any 2 (240 GSM Tees) for ₹1,399 on UPI:** Automatically combines ₹99 multi-tee bundle savings with ₹100 instant prepaid discount (₹199 total discount on 2x ₹799 tees = ₹1,399 net / ₹699.50/tee), yielding **36.0% net margin** on single-parcel dispatch.
- **Post-Delivery 90-Day VIP Gift Voucher Engine:** When an order updates to `delivered` in Supabase, `issueOrderLoyaltyVoucher` automatically generates an idempotent single-use `RE-GIFT-XXXXXX` voucher (₹50 for orders ≥ ₹1,000; ₹100 for orders ≥ ₹2,000). The voucher is permanently stored in Supabase `public.loyalty_vouchers` with a 90-day expiry and ₹999 minimum order floor, and rendered in the official Tax Invoice email.
- **Automated 3-Stage Retention Email Cron:** Daily at 2:30 AM IST, Vercel Cron triggers `/api/agent/daily` running `processVoucherReminders`. Dispatches Stage 1 (Day 20 fabric drape & fit check), Stage 2 (Day 45 mid-season drop preview), and Stage 3 (Day 87 urgent 72-hour expiry warning before code deactivation).

Module 2: Both-Side DTF Unit Economics & Landed Cost Breakdown

Every garment in the RareEmber catalog is engineered assuming **both-side high-density DTF printing** (Front chest/typography print + Large rear statement graphic). Even when customers utilize the **₹50 Instant UPI Prepaid Discount**, net profit remains strictly above **20.0%**.

Silhouette & Category	Blank	Both Prints	GST	Air + Pack	Landed Cost	Base Retail	Net Prepaid	Net Profit	Net Margin

Partial COD Profit Margin Upside: When customers opt for Partial COD (₹100 advance deposit + doorstep balance), RareEmber adds a transparent **₹49 Courier COD Handling Fee**. Because Delhivery and Blue Dart charge ₹40 for cash collection, RareEmber generates an additional **₹9 net cash profit per order**, raising actual COD profit margins to **24.5% – 28.5%**.
